 DUR

NEW YORK'S COMIC JOURNALS.

HUMOROUS NEWSPAPERS THAT ADD TO LIFE'S ENJOYMENT.

Story of Their Rise and Progress—Some Have Long Lives and Others Die Early.

For many years ambitious newspaper men in this country have cast eyes at the great comic journals of Europe, which have contributed so largely to the making of history across the water, and although from the earlier part of the century innumerable humorous weeklies were started from time to time, and in some instances enjoyed a fleeting popularity, not one of them was really successful until *Puck* became firmly established in the popular regard. *Puck's* property has been less than a decade ago and paved the way for the success of several other papers of its class.

It is no exaggeration to say that the number of comic papers which have failed in this country runs far into the hundreds, and the amount of money squandered on them far into the millions of dollars. There were many reasons for these failures, chief among them was the fact that they had to create a field for themselves, whereas nowadays the comic weekly is looked upon as a necessity, and a new venture in that line has only to secure for itself a share of the patronage which stands ready for any publication with fun in it.

Of the great comic papers of Europe, the *Fliegende Blätter*, published in Munich, is by far the best. Messrs. J. and C. Schneider, its proprietors and editors, have one of the best and most complete printing establishments in the world, and moreover, receive a large number of contributions from the very best humorous artists in Germany, who esteem it a high honor to have their pictures appear in such a popular journal. They have no regular staff, but rely entirely on outside contributions.

Among the artists who have been brought into prominence by the *Fliegende Blätter* may be mentioned Wilhelm Busch, Oberlander and Schlittgen, the last named occupying in German society a position similar to that which Du Maurier enjoys in England.

Another German paper which has exerted a great influence politically is the *Berlin Karicaturenblatt*, which started during the revolution of 1848 and has been a leader of the opposition ever since. It has numbered among its readers the Emperor Nicholas of Russia, the Emperor Louis Napoleon, and, indeed, nearly every statesman and potentate in Europe. The caricatures of Napoleon's waxed mustache and the three hairs on Bismarck's head helped to make it famous from one end of the world to the other. These were the work of Wilhelm Scholz, who has been identified with the paper ever since its inception in the stormy year of '48, and still the chief member of its staff. Herr Scholz is the oldest caricaturist in Europe, and, although but a poor draughtsman, is noted for the force and humor of his pictures.

In Paris the *Journal Amusant* and *Le Caricature* stand first among the multitude of comic weeklies. Gavarni, Haris and Caran d'Ache may be mentioned as the most popular artists contributing to these papers.

Puck is, of course, the leading funny paper of England, and Du Maurier and Tenniel are its principal artists. Du Maurier stands unrivaled as a delineator of English society, and Tenniel's political cartoons, taken by themselves, are a complete history of England during the past quarter of a century.

All these papers were carefully studied by Messrs. Keppler and Schenckman when they started *Puck*, and they wisely determined to imitate none of them in their American venture. Their colored cartoons attracted attention from the first, but it was a long time before the paper became an assured success. Many a time the question of abandoning the English edition was seriously discussed in the office, and it was a weary and discouraging struggle before it finally reached a paying basis.

Sydney Rosenfeld was the first editor of *Puck*. He was succeeded by H. C. Banner, who still holds the position, and is also well known as a writer of stories and verse. Rosenfeld meantime has achieved renown as a writer and adapter of plays and librettos. J. A. Wales, an artist of great originality and ability, left *Puck* to found the *Judge*, and died a year ago. A. C. Oppen, who came from Frank Leslie's to *Puck*, is still a member of the staff, and is one of the most comic artists in the country. He possesses a rare art of making pictures that are really funny in themselves, and awaken laughter in the legend which accompanies them. His publication of his best pictures has been published in a volume called the "Upper *Puck*," which has had a wide sale.

C. Jay Taylor, one of the best artists on the paper, was formerly on the *Graphic*. His industry is shown by the quantity of work which his fine qualities mark him as a conscientious and reliable man. R. K. Munkittrick, well known as a poet and humorist, has been a member of the staff for about eight years, and was prior to that time a contributor to the *Graphic*. He has been a member of the staff since the time that its colored rival appeared in the field. Mr. Munkittrick has a solemn face and a witty tongue, and is a member of the staff, and does most of his work at home.

The German edition of *Puck* is edited by Carl Hauser, who has also been actor and playwright. Mr. Hauser enjoys great popularity among the Germans of New York, and is in great demand on all festive occasions, when he is invariably called upon for a poem or recitation.

Puck's rival, *Judge*, was established a few years ago, after the downfall of *Clay*, by J. A. Wales, and, indeed, nearly every one fell into the hands of J. W. Arkell, its present proprietor. The first editor of *Judge* was George Small, since dead, who wrote under the name of "Trickster." He was succeeded by George H. Jessop, the well-known writer of plays. Its present editor is Isaac M. Gregory, formerly of the *Graphic*.

The artistic head of the paper is Bernhard Gillam, who was for some time one of the chief cartoonists on *Puck*. It was during this period that he made himself famous by his pictures of the "Tattooed Man," which unquestionably had immense weight in the campaign of 1884. Mr. Gillam is an Englishman by birth, but came to this country so young that he is an American to all intents and purposes. He has an observant eye, plenty of ideas, and remarkable ability as a cartoonist. Associated with him on *Judge* are Mr. Zimmerman and H. S. Goodwin. The former handles the political cartoons, and writes sketches and other papers. His income from these sources is said to be very large.

Another paper which has proved successful in more recent years is *Life*, which was founded about eight years ago by J. A. Mitchell, the artist. Associated

with him at the start were A. D. Miller as business manager and Mr. Martin as editor. Mr. Miller, whose energy and the business qualities contributed largely toward making *Life* a valuable newspaper property, has since then found his reward, and is now a partner in the business. Mr. Martin was succeeded by Henry Guy Pooleman, who later left for *Harper's*. His successor on *Life* was Frank White, a bright New York journalist, who had previously contributed to the different comic papers in the country. Success, however, White resigned his position last spring to go to London, and was succeeded by James McCallie, the present incumbent.

Earlier years were passed in Mr. White's studio in Broadway, near Twenty-seventh street, but some time ago it moved to the offices which it now occupies on West Twenty-third street, near Fifth avenue. The paper is a very profitable one, and as it does not use colors nor maintain an extensive plant, it is conducted with a comparatively small amount of trouble.

Tid-Bits, which was started as a sort of five-cent imitation of *Life*, has since changed its name to *Fun*, and raised its price to ten cents. It has not yet succeeded in making much of a noise in the world, though its witticisms are widely quoted. *Fun* started in an unobtrusive way in Austin, Texas, and kept its circulation moderate by sheer force of originality and cleverness. It soon outgrew the narrow limits of its native town and opened an office in New York, where it is now published by its founders, Messrs. Sweet and Knox. It has a very large circulation and makes a great deal of money, and is by far the best of the new papers.

Humor has now become a part of the daily life of the American reading public, for besides the sources of supply already named, there are a host of other papers which have their own "funny man" or humorous department, and in some cases, as for instance, the *Detroit Free Press*, the funny man has given his journal a national reputation.

Bailey, of the *Danbury News*, was one of the first of these "funny" men, and for a time his paper was a great success. He was, however, not content with his position in the world, and he has since moved to New York, where he is now publishing a paper called the *Fun*.

Burdette made a reputation first for the *Burlington Hawkeye* and afterward for the *London Standard*, and is now in the field of humor.

Bill Nye first came before the public as a humorist, but removed to New York a year ago, and is now one of the most successful of his craft in the United States. His weekly letter is duplicated in about fifty papers, and his income from writing and lecturing is said to exceed \$200,000 per annum. Bill Nye resides on Staten Island, and in spite of the enormous quantity of work that he turns out, he manages to maintain a high standard of excellence in the storied line of humor. In that particular he is the envy of his brethren of the press.

The superb buildings which are now occupied by *Puck* and *Judge* are not, as is plain to words, the wonderful growth of a business which ten years ago was looked upon as a hopeless one. The amount of money which has been invested in the two papers is an illustration of the fact that comic journalism has become in this country, and it is not improbable that it will continue to be so for many years to come.

SUNNITES AND SHIITES.

The Two Great Divisions Among the Moslems.

There are among the Moslems two great divisions, the Sunnites and the Shiites. The former are the majority, and the latter are the minority. The Shiites are named after Ali, the nephew and son-in-law of Mohammed, with greater love than they do Mohammed himself. They are named after Ali, the nephew and son-in-law of Mohammed, with greater love than they do Mohammed himself.

The Shiites declare that Mohammed was the last of the prophets, and that he was succeeded by Ali. They believe that Ali was the true successor of Mohammed, and that he was the only one who was worthy to succeed him.

The Shiites declare that Mohammed was the last of the prophets, and that he was succeeded by Ali. They believe that Ali was the true successor of Mohammed, and that he was the only one who was worthy to succeed him.

ALL AROUND THE WORLD.

A writer in *Blackwood's Magazine* figures that the number of British subjects who emigrated from Great Britain during the first six months of this year was 138,525, which is a reduction of 18,225 as compared with the same period last year.

According to Mr. Ruskin's recent criticism, there is no genius about the English language. He defines the Welsh language as the language of the Scotch and the Irish of the Scotch.

An eleven-inch steel shell costs the Navy Department \$125, making a full-sized eleven-inch bombardment an expensive matter. Modern diplomacy is by several per cent. cheaper than is modern warfare.

Prince Bismarck has at Varzin 22,000 acres, of which 15,000 are covered with glorious forests of oak and beech. His house farm comprises 400 acres, and the remainder of the cleared land is let in farms of about 400 acres each.

Henry Irving is the most scholarly looking of all living actors. He is as much inferior to Booth as an actor as he is superior to him as a manager and master of stage craft. The chief fault of Irving's acting is too little nature and too much art.

The wooden shoe is only worn in France and not only found in Italy into this country, but its manufacture requires even team power to supply the demand. Butternut furnishes a desirable material.

An authority upon provisions estimates that half a pound of butter is a good allowance for each person; half a pound of coffee a week and a pound and a quarter of sugar for each person makes five dollars' worth.

A remarkable instance of long-continued service in the employ of a single concern is furnished in the case of Smith D. Freeman, who died recently at Staten Island at the age of 82 years, after having been continuously employed by the Staten Island Ferry Company for 57 years.

Tract twenty-two years ago in 2171. The great gelding, a black one, was sold for \$750, and his performance excited the world's record \$14,000 was hung up on the different races.

The street cars at Lyons, in France, are hereafter to be opened by a system of compressed air, which has been found to work satisfactorily in Nantes and other French cities. The cars are said to run smoothly and with little noise, while the machinery is simple and does not require a skilled mechanic to superintend it. The cost is less than with horses, steam or electricity.

Canada has 124,859 Indians, of whom 37,044 are in British Columbia, 26,398 in Manitoba and the Northwest Territory, 17,700 in Ontario, 12,465 in Quebec, 8,000 in Athabasca, 7,000 in the Mackenzie district, 4,010 in Eastern Rupert's Land, 1,000 on the Arctic coast, 2,445 in New Scotland, 2,038 in the Peace River District, 1,594 in New Brunswick, 1,000 in the interior of Labrador and 319 in Prince Edward Island.

There is in Ozark, Mo., a remarkable relic of the tornado that devastated Marshfield in 1880. The day after the disaster occurred, a blacksmith, while working on a black iron boiler, found a piece of wood, which he took for a piece of the boiler, and found it to be a piece of the boiler.

There is in Ozark, Mo., a remarkable relic of the tornado that devastated Marshfield in 1880. The day after the disaster occurred, a blacksmith, while working on a black iron boiler, found a piece of wood, which he took for a piece of the boiler, and found it to be a piece of the boiler.
